- Assessment
- Gap analysis
- Risk analysis
- Strategic roadmap
- Implementation
- Remediation
- Quality management
- Software selection
- End-user rollout
- Process engineering/  
Re-engineering

### OXFORD'S CONSULTING METHODOLOGY

We leverage our proven methodology to deliver consulting projects on time and on budget. Our methodology includes:

- **Project Delivery Framework - CLEAR**

CLEAR encompasses a managed project delivery approach, methodology, and tools designed from the ground up to manage portfolio, program, and project risk. This approach fully integrates project, risk, financial, and change management using existing client tools already in place or project tools provided by Oxford.

- **Program Risk Management - PRM**

PRM is a process developed to provide objective, timely assessments of your project. The process encompasses a series of pointed, short time frame reviews and assessments of project activities that are conducted throughout the lifecycle of the project. These risk reviews and assessment tools are easily adapted to align with any project delivery framework.

- **Program Collaboration - SHARE**

SHARE is our team collaboration and communication environment designed to bring together team members, client personnel, and Oxford engagement management. Our customizable portal provides instant access to a dashboard of information, allowing instant visibility to the program, project, and key processes.
