

OXFORD TRAINING & GO-LIVE SUPPORT

Oxford Healthcare IT delivers highly skilled consultants to ensure hospital systems and physician practices have successful EMR implementations, upgrades and optimization projects. We have an unparalleled network of highly skilled consultants across the United States, and we deliver results: Oxford fills the majority of the assignments for which we compete.

Oxford Healthcare IT consultants utilize industry best practices to integrate EMR applications into our clients' business processes, and guide our clients through all phases of the EMR program lifecycle.

Oxford Healthcare IT can provide go-live support and training for multiple EMR vendors, including:

- Epic
- MEDITECH
- Allscripts
- Cerner
- McKesson
- ... and more

Oxford Healthcare IT consultants are well versed in a wide range of applications, and are ready to guide your organization at a moment's notice. Whether your organization needs experienced trainers to work with your staff to ensure proficiency with a new EMR system, or floor support resources to troubleshoot any issues that may arise before and after go-live, we can help. Many of our training & go-live resources are RNs and MDs, so they understand the needs of your clinicians and the stress that can come from a major EMR implementation.

Whatever your needs may be, whether it's to augment your existing support staff or deploy an entire "at the elbow" support team, we will be there. With our dedicated database of trainers and go-live support resources, we can deploy an entire team with a very short lead time, customized to meet your project needs.

Our training & go-live support services include, but are not limited to:

- Project Planning and Project Management
- Clinical Readiness Assessment/Implementation
- Super User, End User, and Refresher Training
- Training Curriculum Creation
- Cutover Planning
- Technical Dress Rehearsal
- 24/7 Support Post-Launch
